

Web Based Travel Insurance

Since its inception Mondial's Travel Division has consistently explored new ways of providing travel insurance to its clients. With the continuing growth of the Internet, Mondial was quick to create online travel insurance products and supporting technology to provide an easily accessible means of purchasing travel insurance on the Web.

Mondial has invested heavily in the development of a pan-European e-Commerce platform, allowing integrated and standalone web based insurance services to be made available in multiple countries. The solution has been designed to cater for local language, product, regulatory and currency requirements.

Mondial has the ability to 'white label' its e-Commerce solution and currently provides such services to the following clients:

lastminute.com

easyJet.com

Expedia.com™
